Changes to Page Elements (Not Module Specific)

Color Variables

Add new color variables and update existing variable hex values in CSS.

Purple (--purple):
change **existing** variable value from #59007B to #510C76

Medium Purple (--purple-md):
new variable set to #8348AD

Medium Purple, 70% tint (--purple-md-70):
new variable set to #A97CC6

Medium Purple, 30% tint (--purple-md-30):
new variable set to #DAC5E6

Medium Purple, 20% tint (--purple-md-20):
new variable set to #E6D8EE

Medium Purple, 10% tint (--purple-md-10):
new variable set to #F2EAF6

Medium Purple, 5% tint (--purple-md-5):
new variable set to #F8F5F9

Bright Purple (--purple-lt):
change **existing** variable value from #982EB4 to #9E28B5

Bright Purple, 15% opacity (--purple-lt-25):
change **existing** variable value to rgba(158, 40, 181, .1451)

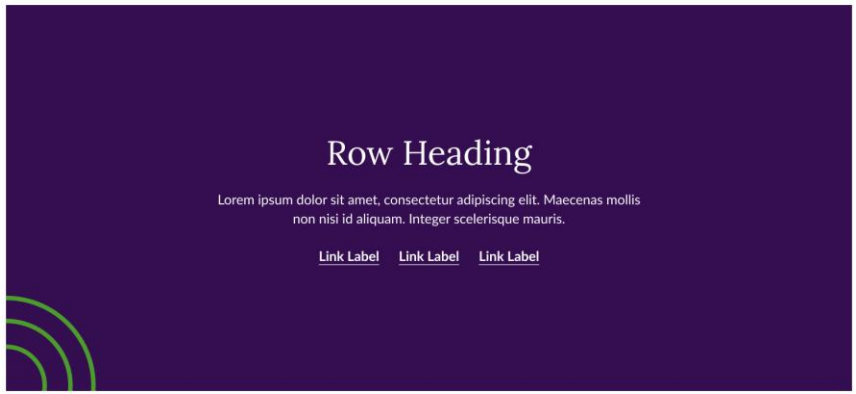

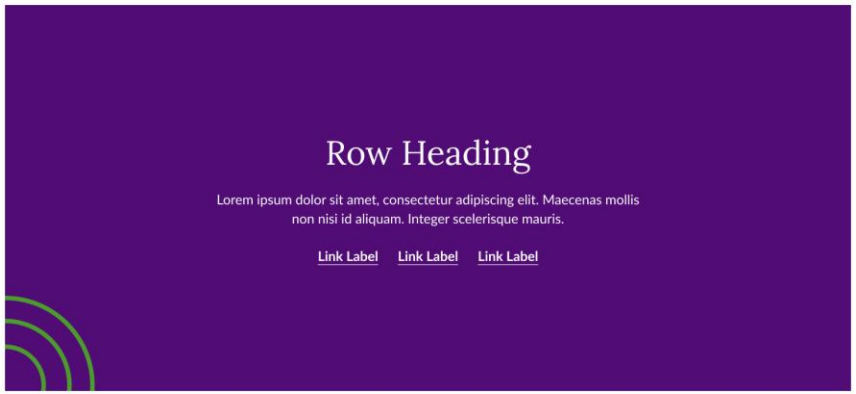

Emerald Green (--emerald):
new variable set to #4C9C2E

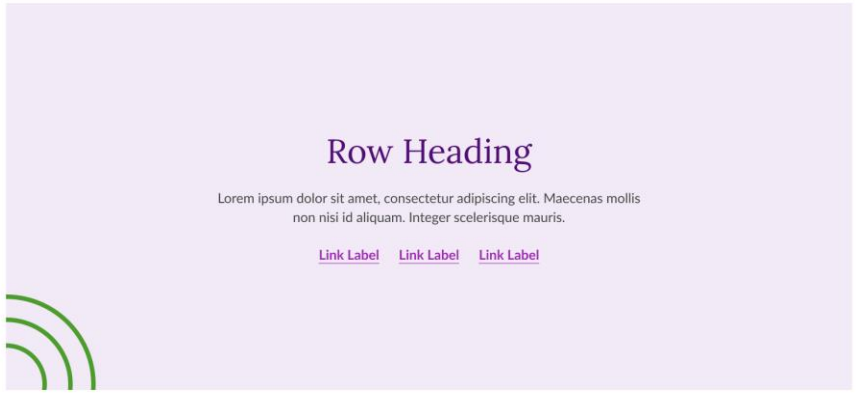

Background Colors

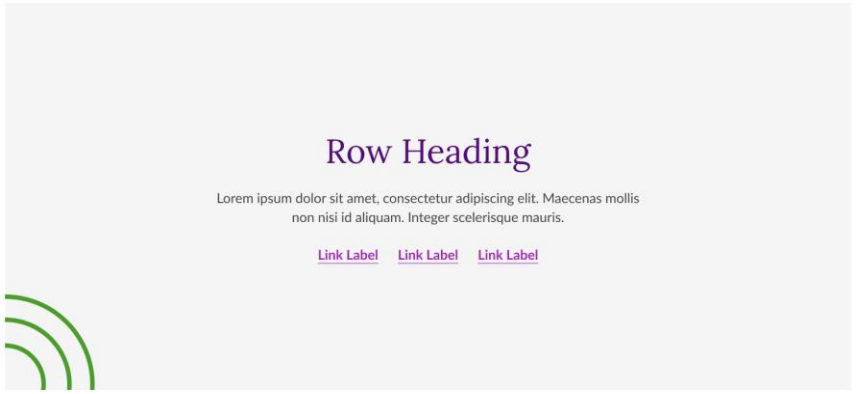

Add additional background options as needed, to add flexibility and enable module reuse.

- Dark Purple: (--purple-dk)
- Purple: (--purple)
- Light Purple: (--purple-md-10)
- Gray or White, depending on module: (--gray) or (--white)

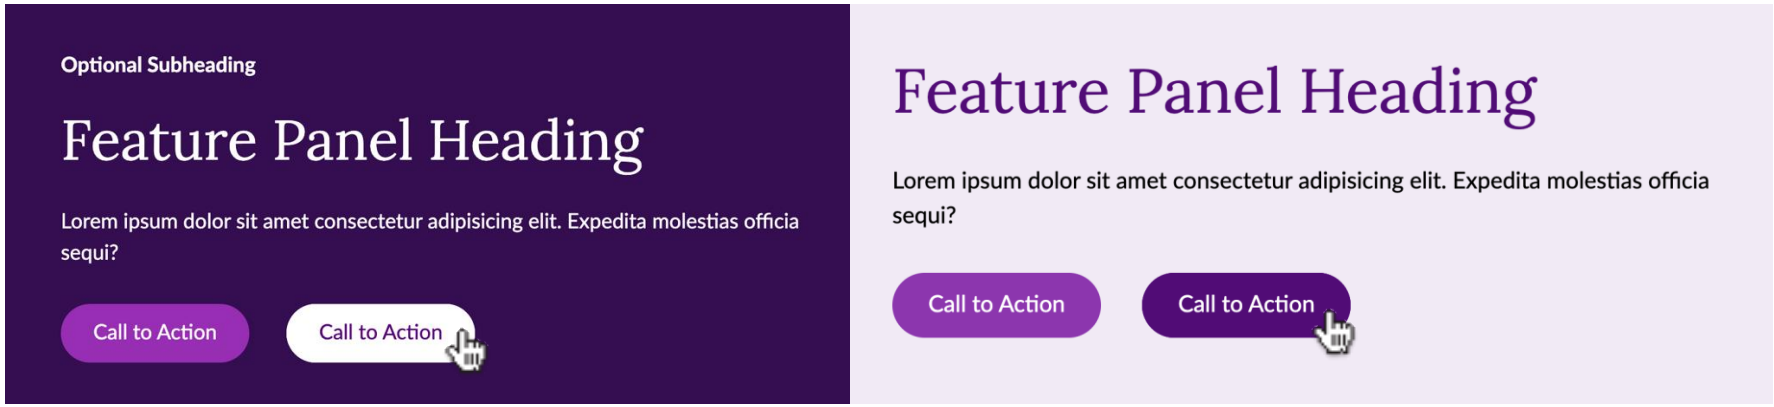

Buttons

Round corners, adjust hover styles, and adjust padding.

- The make buttons look more like buttons, round the corners by adding a large border-radius, e.g.: (border-radius: 9rem;)
- Then, remove the outline that appears on hover in favor of distinct light and dark hover styles
    - When set on a dark background, on hover, the button background should be white (--white), with purple text (--purple)
    - When set on a light background, on hover, the button background should be purple (--purple), with white text (--white)
- Increase the horizontal padding and reduce the vertical padding to make buttons shorter and wider, e.g.: `padding: .75em 1.5em;`

Text Links

Change link styles for most instances of black underlined to be bright purple.

- Change the default text link style from black to bright purple (--purple-lt)
- Exceptions, which should remain black, include:
    - Links in Links List modules and sidebars that are accompanied by an arrow icon
    - Accordion drawer labels that are accompanied by a plus/minus icon
    - Links denoting an “active” state, such as the “Locations” carousel toggle below
- When set on a purple or dark purple background, link text should be white (--white)

Panel Heading

Subheading — Optional Link (3-5 Words)

Lorem, ipsum dolor sit amet consectetur adipisicing elit. Magnam quibusdam eligendi excepturi accusamus eveniet reiciendis, dolore atque cum.

Subheading — Optional Link (3-5 Words)

Lorem, ipsum dolor.

Lorem, ipsum dolor sit amet consectetur adipisicing elit. Incidunt fugit quidem at hic itaque iusto, doloremque debitis. Eos!

Arrow Links

Adjust Links List links to always show the arrow icon; adjust hover styles and background color

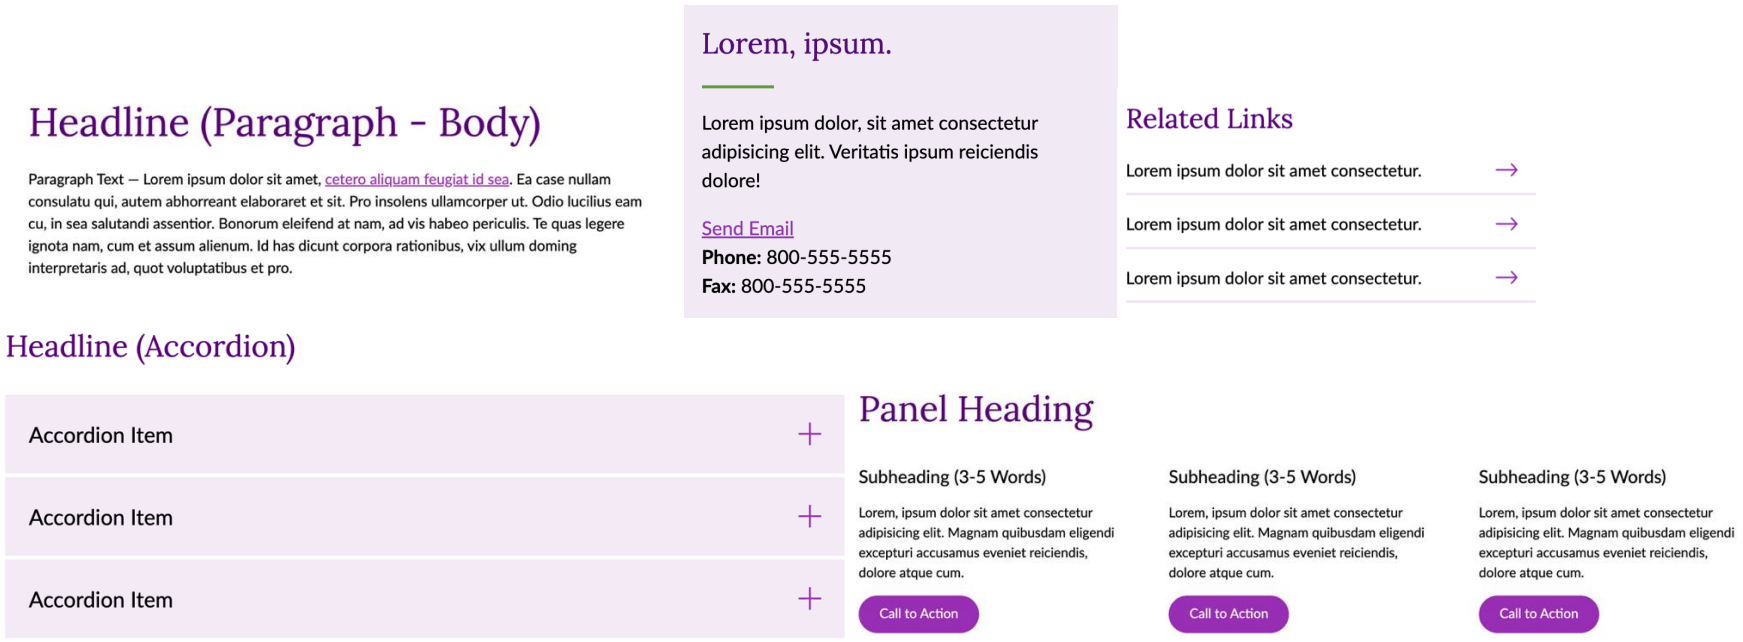

- In full-width and narrow row Links List modules, show a bright purple (--purple-lt) arrow icon next to each link. On hover, change the icon to show a white arrow (--white), on a bright purple (--purple-lt) circle background, change the text color to bright purple (--purple-lt), and move the circle icon 1rem to the right.
- In the sidebar row Links List module, show the existing bright purple arrow with no background by default. On hover, change the text color to bright purple, and move the arrow icon .5rem to the right.

Headings

Make H2s purple to add color to the page, change H3s and below to Lato for increased distinction between headings.

- Change H2s to purple (--purple)
- Change H3, H4, H5, and H6 from Lora to Lato font

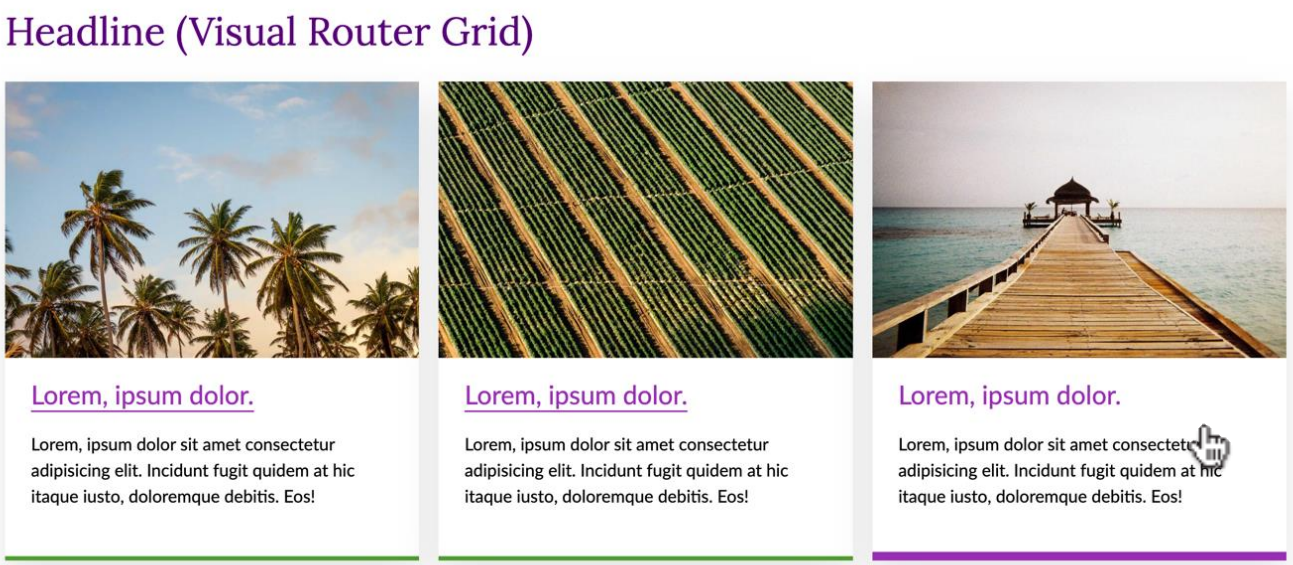

Cards

Lighten card description area, adjust box shadow and hover interaction.

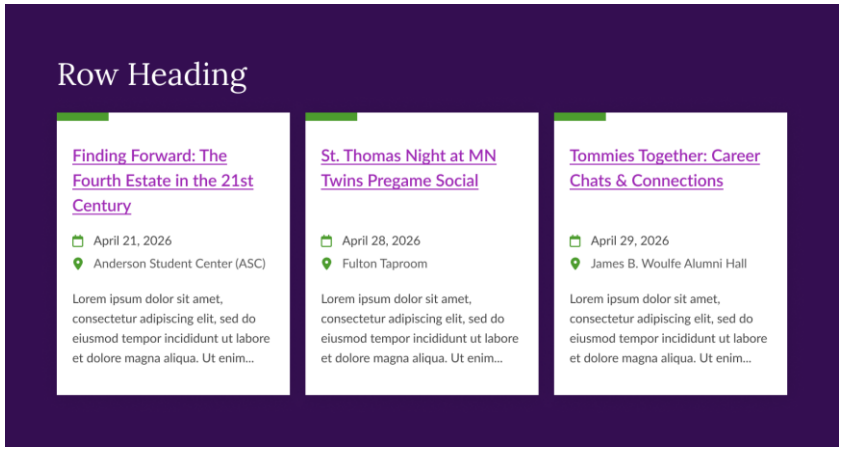

- Change the card description background color to white (--white)
- Add a drop shadow to the cards in their default (non-hover) state: `box-shadow: 0 1em 2em var(--black-10);`
- On hover, instead of increasing the card's shadow, change the bottom border color to bright purple (--purple-lt), and increase the bottom border thickness to 8px.
- Remove the Color option that specifies a bottom border color from *individual* cards. Add a color option that lets you specify the bottom border color for *all* cards. It should default to Green (--emerald) but retain a None option.

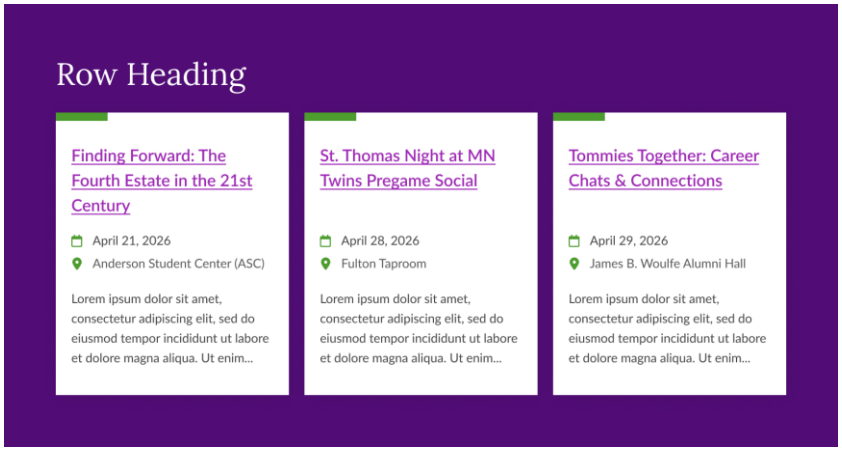

- ***Fix***: In Cascade, the card description text is rendered in between empty paragraph elements. Please move the content into the paragraph above (with the .t-sm class applied to it) so this text is slightly smaller than regular body text.

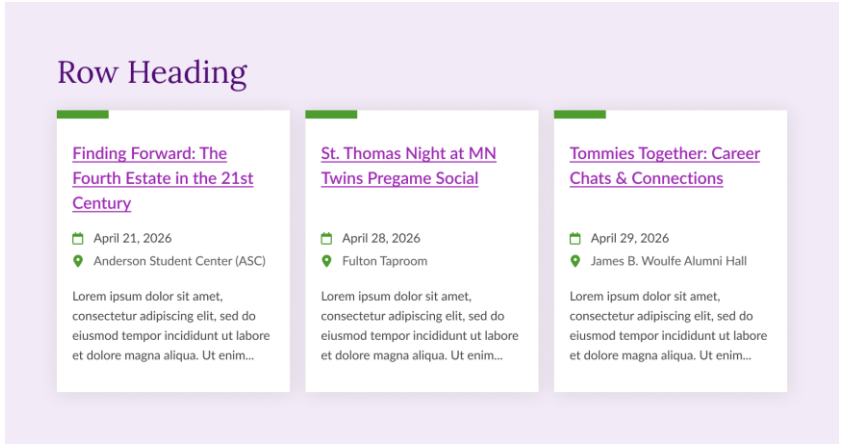

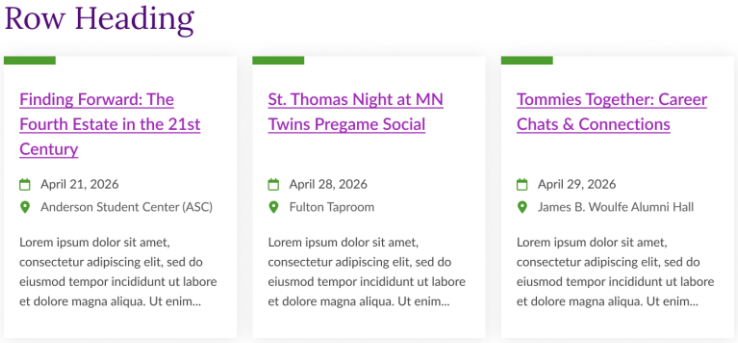

Add 4 background options; change accent color to emerald

- Dark Purple (--purple-dk)
- Purple (--purple)
- Light Purple (--purple-md-10)
- White (--white)

Changes to Specific Modules

Accordion / Accordion with Image

Add background color options, change drawer colors and plus/minus icons from grays to purples, adjust subheading style

- In addition to the default White (--white) background color, please add Light Purple (--purple-lt), Purple (--purple), and Dark Purple (--purple-dk) background options.
    - For the white background version:
        - Change the background color of accordion drawers in their default state to Medium purple, 10% tint (--purple-md-10)
        - On hover/focus and when expanded, change the drawer background color to Medium purple, 20% tint (--purple-md-20)
        - Change the background color of the content area (.Accordion__content) to Medium purple, 5% tint (--purple-md-5)
    - For the light purple, purple, and dark purple versions:
        - Darken the accordion drawers in their default state to Medium purple, 20% tint (--purple-md-20)
        - On hover/focus and when expanded, darken the drawer background to Medium purple, 30% tint (--purple-md-30)
        - Keep the background color of the content area (.Accordion__content) as Medium purple, 5% tint (--purple-md-5)
- Please also change the accordion subheading to Lato Bold at ~1.25rem.
- And change the plus/minus icons to light purple (--purple-lt).

- ***Fix***: In Cascade, when the accordion drawer label wraps to multiple lines, the plus/minus icon gets stretched and skewed.

Accordion Item

Call to Action Panel

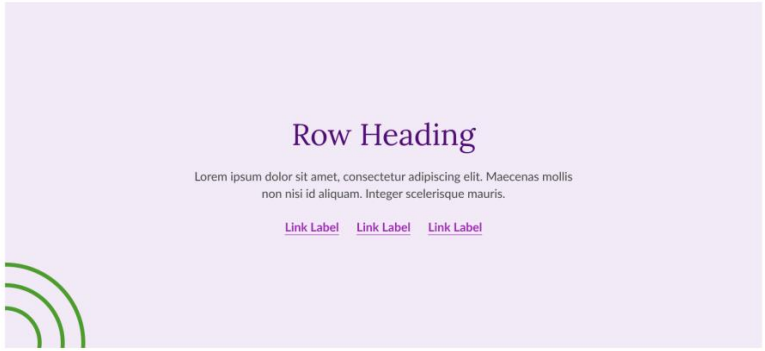

Add background color options, change rings to green, and make full-width

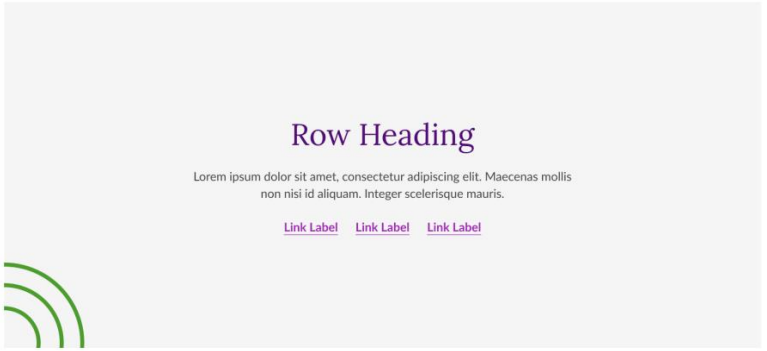

- Please add additional background colors:
  - Dark Purple (--purple-dk)
  - Purple (--purple)
  - Light Purple (--purple-md-10)
  - Gray (--gray)
  - *Note, we should also keep the background image option*.

- ***Fix***: Please reinstate the full-width nature of this module, so it extends beyond the left and right edges of the max content width to fill the entire width of the viewport.

Feature Panel

4 background options with circles: green OR purple

- In lieu of a single module option, that controls both the module's background color and the accent graphic and color, we'd like to move to separate module options to control the background and accent graphic styles independently.
    - Background Color: Dark Purple, Purple, Light Purple, Gray
    - Accent pattern: Green Circles, Purple circles, Stained Glass, None.

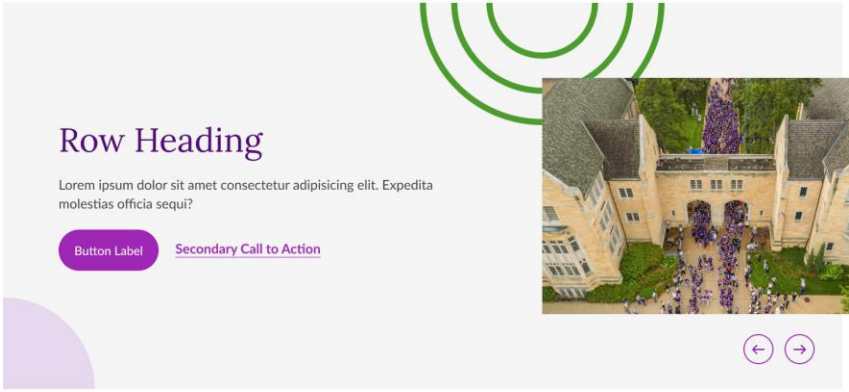

Color info (left to right, top to bottom):

1. Background: Dark Purple (--purple-dk); Fill circle: Purple (--purple); Line circles: Green (--emerald)
2. Background: Dark Purple (--purple-dk); Fill circle: Purple (--purple); Line circles: Medium Purple, 70% tint (--purple-md-70)
3. Background: Purple (--purple); Fill circle: Dark Purple (--purple-dk); Line circles: Green (--emerald)
4. Background: Purple (--purple); Fill circle: Dark Purple (--purple-dk); Line circles: Medium Purple, 70% tint (--purple-md-70)
5. Background: Light Purple (--purple-md-10); Fill circle: Medium Purple, 30% tint (--purple-md-30); Line circles: Green (--emerald)
6. Background: Light Purple (--purple-md-10); Fill circle: Medium Purple, 30% tint (--purple-md-30); Line circles: Medium Purple, 70% tint (--purple-md-70)
7. Background: Gray (--gray); Fill circle: Medium Purple, 20% tint (--purple-md-20); Line circles: Green (--emerald)
8. Background: Gray (--gray); Fill circle: Medium Purple, 20% tint (--purple-md-20); Line circles: Medium Purple, 70% tint (--purple-md-70)

4 background options with stained glass

- Dark Purple (--purple-dk) & Purple (--purple): Stained glass icon in Medium Purple (--purple-md) at 30% opacity
- Light Purple (--purple-md-10) & Gray (--gray): Stained glass icon in Medium Purple (--purple-md) at 10% opacity (*currently: 6%)*

4 background options with no iconography

Hero – Home Page with CTAs

Adjust colors and CTA styles

- Change line color to green (--emerald)
- Change the font style of the CTA heading from italic to regular.
- Remove all-caps from the arrow link and underline by default (using `.link-underline--reverse`).

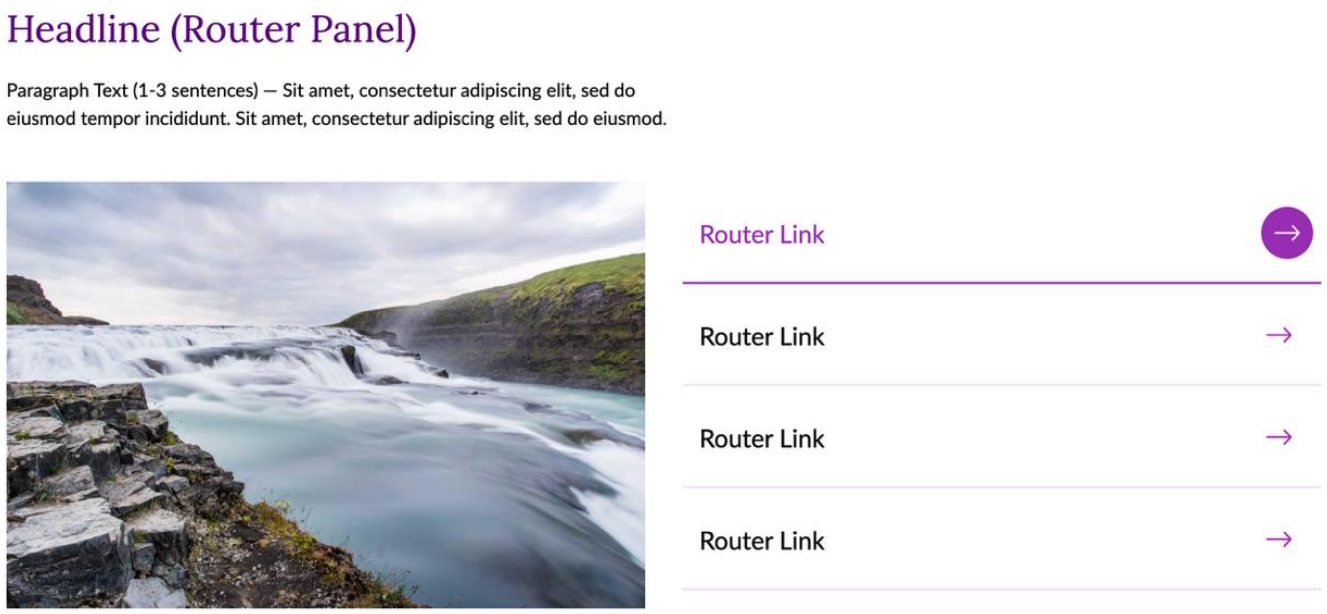

- ***Future phase***: On mobile, remove the pagination from the CTAs and show them all by default (needs styling)

Links List / Links List with Image

Remove partial background color

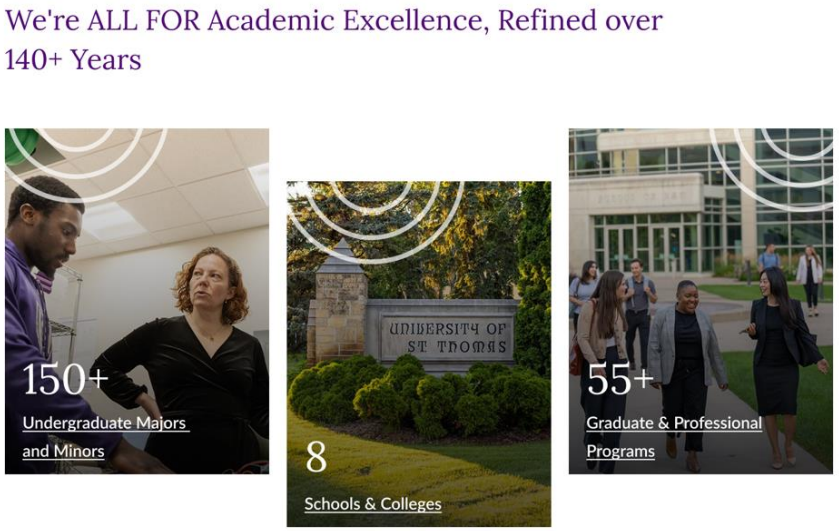

- In addition to the changes to arrow links, please remove the background gradient that currently adds gray behind 2/3rds of the module at larger screen sizes.
- In a future phase, this module should gain additional background color options (that span the full width of the module).

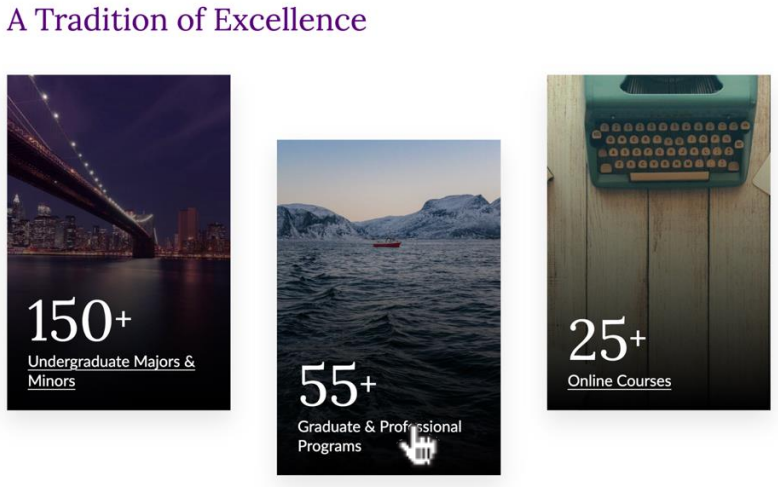

Program Cards

Remove transparent circles and hover text, move link to Small Text field, adjust font styles

- Change the transparent accent circles to white outlines at 70% opacity and add a module option to disable them
- Remove link that is currently shown below the card subheadings on hover, and move the link functionality to the subheading
- Change the subheading field to Lato

Sidebars – Content / Contact Info

Change background color and heading underline color

- Change the background color of the Content and Contact Info sidebars to Medium Purple, 10% tint (--purple-md-10)
- Change the line underneath the H2 to Green (--emerald)

Lorem, ipsum.

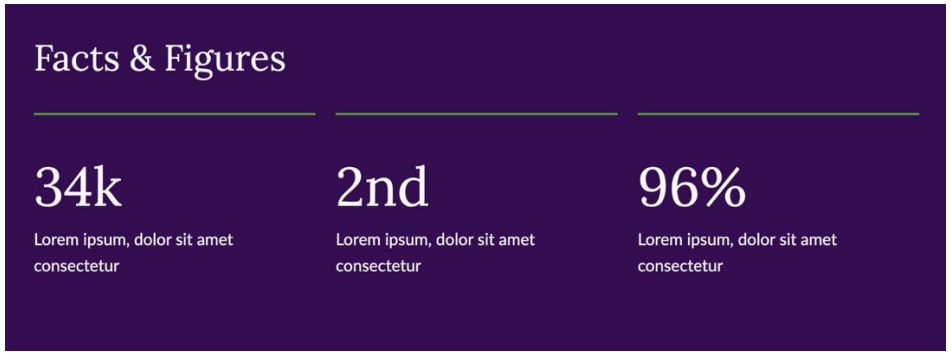

Lorem ipsum dolor, sit amet consectetur adipisicing elit. Veritatis ipsum reiciendis dolore!

Send Email
Phone: 800-555-5555
Fax: 800-555-5555

Stats – Background Image

Change line color to green, add background color options so an image isn't required

- Change the stat underline accent color to Green (--emerald)
- Add background color options that negate the need for a background image
    - Dark Purple (--purple-dk), Purple (--purple)
    - Light Purple (--purple-md-10), Gray (--gray)
- Once this image no longer requires a background image, please also rename the module to Stats – Lines

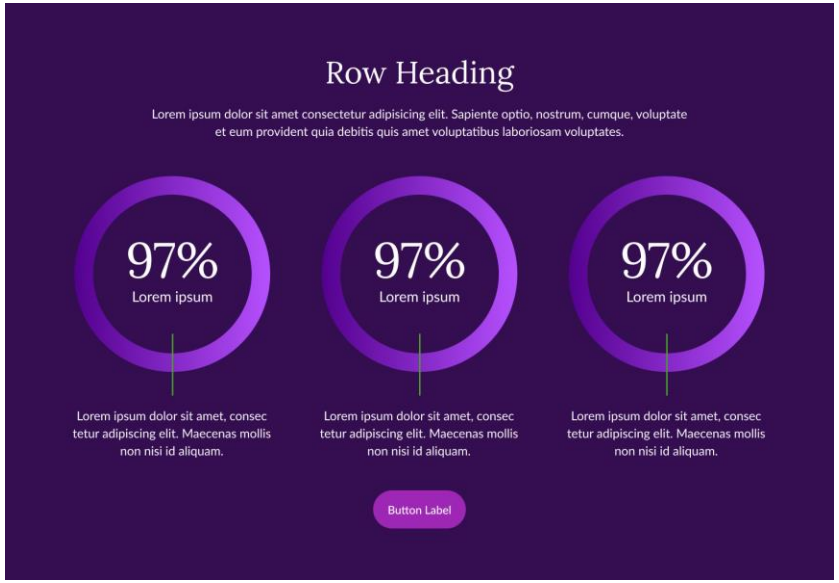

Stats – Circles

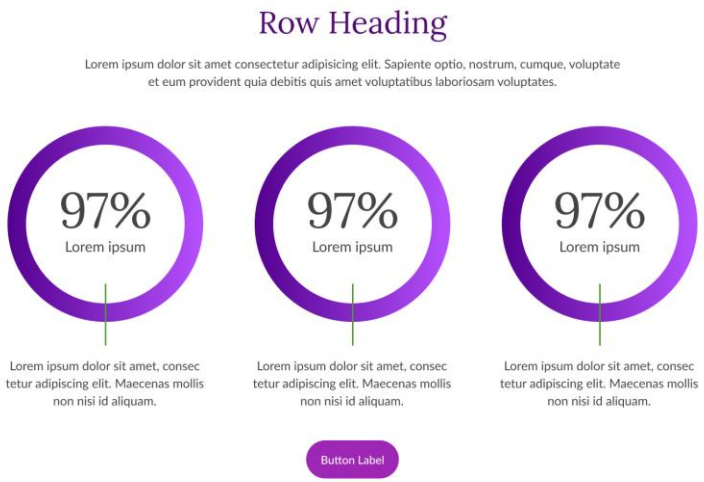

2 background color options, 2 accent color options – 4 total

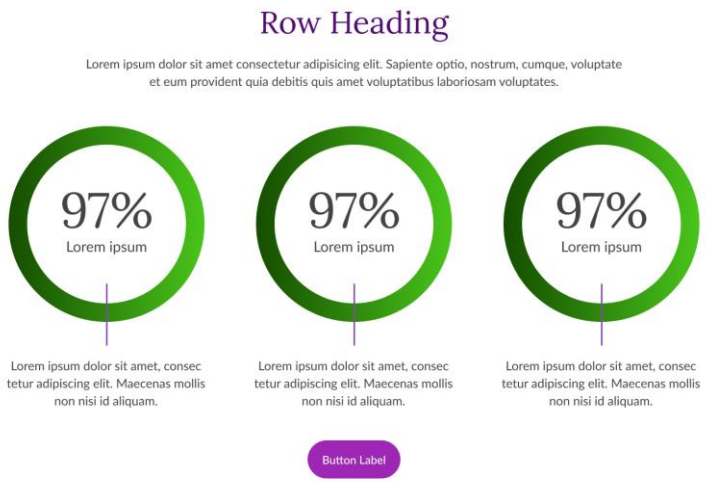

- Please add additional background colors:
  - Dark Purple (--purple-dk)
  - Purple (--purple)
  - Light Purple (--purple-md-10)
  - Gray (--gray)

- In a future phase, this module should gain additional background color options (that span the full width of the module).

Hex code info (left to right, top to bottom):

1. Background: Dark Purple (--purple-dk); Lines: Green (--emerald); Circles: #54018F to #B751FF
2. Background: Dark Purple (--purple-dk); Lines: White (--white); Circles: #154D00 to #49C51B
3. Background: White (--white); Lines: Green (--emerald); Circles: #54018F to #B751FF
4. Background: White (--white); Lines: Medium Purple (--purple-md); Circles: #154D00 to #49C51B

Stats – Feature

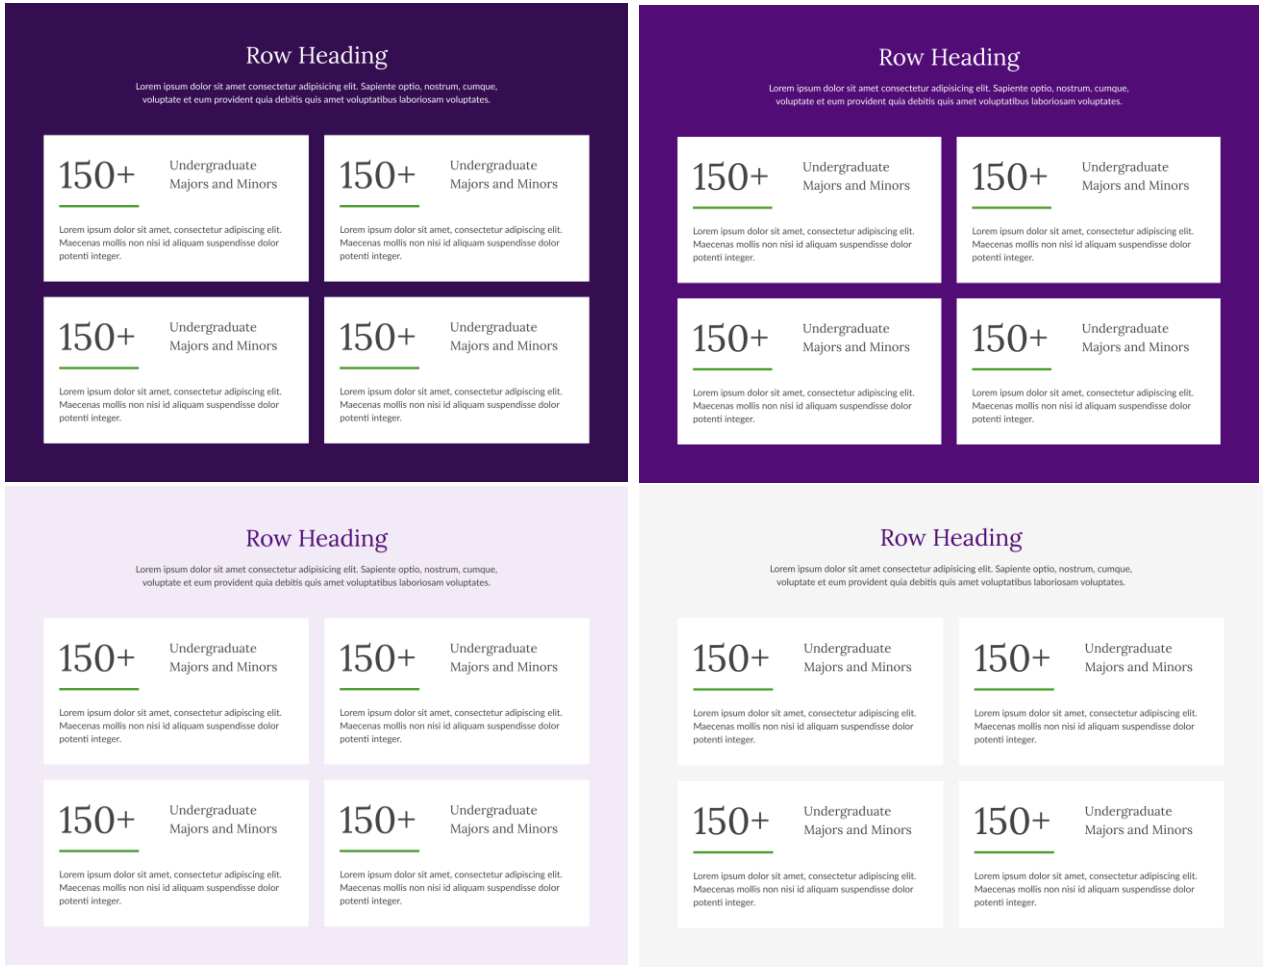

Remove module from Gemini

- This module is unlikely to ever be used. It can be removed from Gemini.

Stats – Panels

Remove circles from cards, change accent to green

- Remove the circles from the bottom right corner of the cards and extend the card description to the full width of the card
- Change the stat underline accent color to Green (--emerald)
- Add a drop shadow to the panels (not currently shown in mockups): `box-shadow: 0 1em 2em var(--black-10);`

Table

Change colors and font styles, add add mobile layout and footnotes field

- Add a new WYSIWYG content field below the table for Footnotes. This can be styled the same as the description field above the table.
- Change the background color of the table head to Medium purple 10% tint (--purple-md-10)
- Change the border of the table head to a 2px thick line of transparent bright purple (--purple-lt-25)
- Change header cells to Lato Bold
- Change the background color of alternating table rows (`tr:nth-child(2n)`) to a Medium purple, 5% tint (--purple-md-5)
- Add a bottom border to the last table row in the table (`tr:last-of-type`) that is a 2px thick line of transparent bright purple (--purple-lt-25)
- On mobile, move the table head border from the bottom to the top of the cell, and reduce the font weight of row headers to 400.
- Please ensure these styles apply to tables within manually created tables within accordion drawers (see 3rd screenshot)

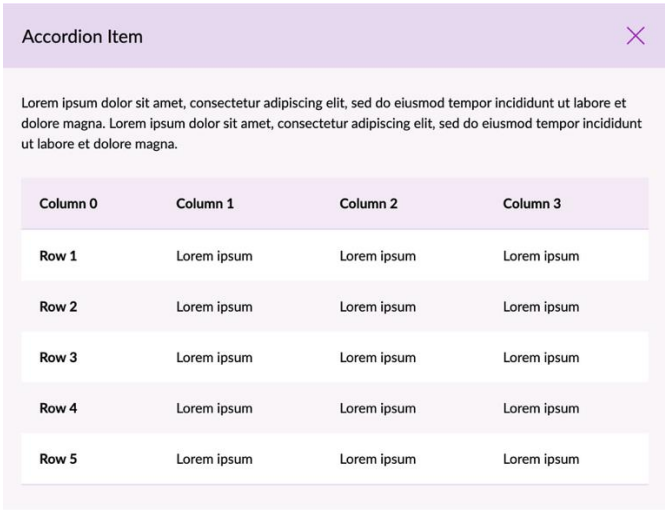

- ***Nice to have***: to give us control over column widths on desktop, add a Width option to each column header that accepts a percentage number and adds it to the front end as an inline style: `<th scope="column" style="width:[width-cascade-field]%">`

Desktop Table

Column 0	Column 1	Column 2	Column 3
Row 1	Lorem ipsum	Lorem ipsum	Lorem ipsum
Row 2	Lorem ipsum	Lorem ipsum	Lorem ipsum
Row 3	Lorem ipsum	Lorem ipsum	Lorem ipsum
Row 4	Lorem ipsum	Lorem ipsum	Lorem ipsum

Mobile Table

Column 0	Row 1
Column 1	Lorem ipsum
Column 2	Lorem ipsum
Column 3	Lorem ipsum
Column 0	Row 2
Column 1	Lorem ipsum
Column 2	Lorem ipsum
Column 3	Lorem ipsum

Text Grid

Extend background color to cover full viewport width

- Please extend the edges of the background color to cover the full width of the viewport on large screens.

Testimonials – Vertical Scroll

Increase left column width on desktop, adjust color and font styles

- On desktop, remove the left padding from the left column and increase the line width of the “What it Mean to Be a Tommie” content
- Remove the background gradient that currently adds gray behind 2/3rds of the module at larger screen sizes
- Add `.link-underline--reverse` to the story link so it’s underlined by default
- Add an mdash before the attribution field (using a `:before` pseudo selector) for consistency with other quote modules
- Change the accent circle colors to alternate between solid Medium Purple (--purple-md) and outline Green (--emerald)
